

Premium Skincare Philosophy

For the Collagen Glow Rejuvenating Facial Treatment

Our signature Collagen Glow Facial is designed with a curated selection of professional skincare products enriched with high-performance, naturally derived ingredients. Every step of the treatment is focused on gentle exfoliation, deep hydration, soothing balance, and skin barrier repair — all without harsh chemicals or irritation.

We use only clean, skin-safe formulations ideal for normal to mildly sensitive skin, delivering visible results from the very first session.

Gentle Exfoliation for Radiance

- AHA (Alpha Hydroxy Acids) – Promotes safe and effective removal of dead skin cells, revealing a brighter, smoother surface.
- Papaya & Pineapple Enzymes – Naturally dissolve dull, damaged skin proteins without abrasion.
- Essential Plant Oils – Help nourish and protect during exfoliation, preventing dryness or discomfort.

Soothing and Skin Balancing

- Prebiotics – Help support the skin's microbiome and strengthen its natural defenses.
- Botanical Extracts – Calm inflammation, reduce redness, and revive stressed or tired skin.
- Mineral Water & Humectants – Restore healthy pH and prep the skin to absorb active serums more effectively.

Hydration & Oxygenation Boost

- Hyaluronic Acid – Delivers deep hydration for plump, dewy, and refreshed skin.
- Oxygenating Complex – Enhances skin vitality and encourages cell turnover by boosting oxygen supply.
- Lightweight Gel Texture – Ideal for massage and LED therapy — cooling, calming, and deeply replenishing.

Moisture Lock & Skin Barrier Repair

- Prebiotics + Soothing Botanicals – Reinforce skin resilience and reduce post-treatment sensitivity.

- • Natural Moisturising Agents – Help rebuild the skin barrier and retain essential moisture.
- • Gentle Comfort Cream – A lightweight, non-irritating formula that seals in hydration and protects after treatment or LED use.
